```
MSGS_URI=$(curl http://$(minikube ip):30567/spaces \
  -H 'Content-Type: application/json' \
  -d '{"owner":"demo","name":"test space"}' \
  -u demo:password | jq -r '."messages-rw"')
```

You can now create a message with a link to a HTML story in it:

```
MSG_LINK=$(curl $MSGS_URI -u demo:password \
  -H 'Content-Type: application/json' \
  -d '{"author":"demo", "message":"Check out this link:
[CA] http://www.bbc.co.uk/news/uk-scotland-50435811"}' | jq -r
.uri)
```

Finally, you can retrieve the message to see the link preview:

```
curl $MSG_LINK | jq
{
  "author": "demo",
  "links": [
    {
      "image":
[CA]"https://ichef.bbci.co.uk/news/1024/branded_news/128FC/
[CA]production/_109682067_brash_tracks_on_fire_dyke_2019.
[CA]creditpaulturner.jpg",
      "description": "The massive fire in the Flow Country in
May
[CA]doubled Scotland's greenhouse gas emissions while it
burnt.",
      "title": "Huge Flow Country wildfire 'doubled
Scotland's
[CA] emissions' - BBC News",
```
