1 Introducing Data Structures

This chapter covers

- Why you should learn about data structures and algorithms
- The difference between algorithms and data structures
- Abstracting a problem
- Moving from problems to solutions

So, you are thinking about learning about algorithms and data structures: excellent decision!

If you are still deciding whether this is for you, I hope this introductory chapter can dispel your doubts and spark your interest on this great topic.

1.1 Why should you learn about Data Structures?
