- *Costs*—Service costs vary by region. Which region is the most cost-effective region for your infrastructure?

Let's assume you have customers not just in the United States but in Australia as well. At the moment you are operating EC2 instances only in N. Virginia (US). Customers from Australia complain about long loading times when accessing your website. To make your Australian customers happy, you decide to launch an additional VM in Australia.

Changing a data center is simple. The Management Console always shows the current data center you're working in on the right side of the main navigation menu. So far, you've worked in the data centers located in N. Virginia (US), called `us-east-1`. To change the data center, click N. Virginia and select Asia Pacific (Sydney) from the menu. Figure 3.21 shows how to jump to the data center in Sydney, also called `ap-southeast-2`.
