

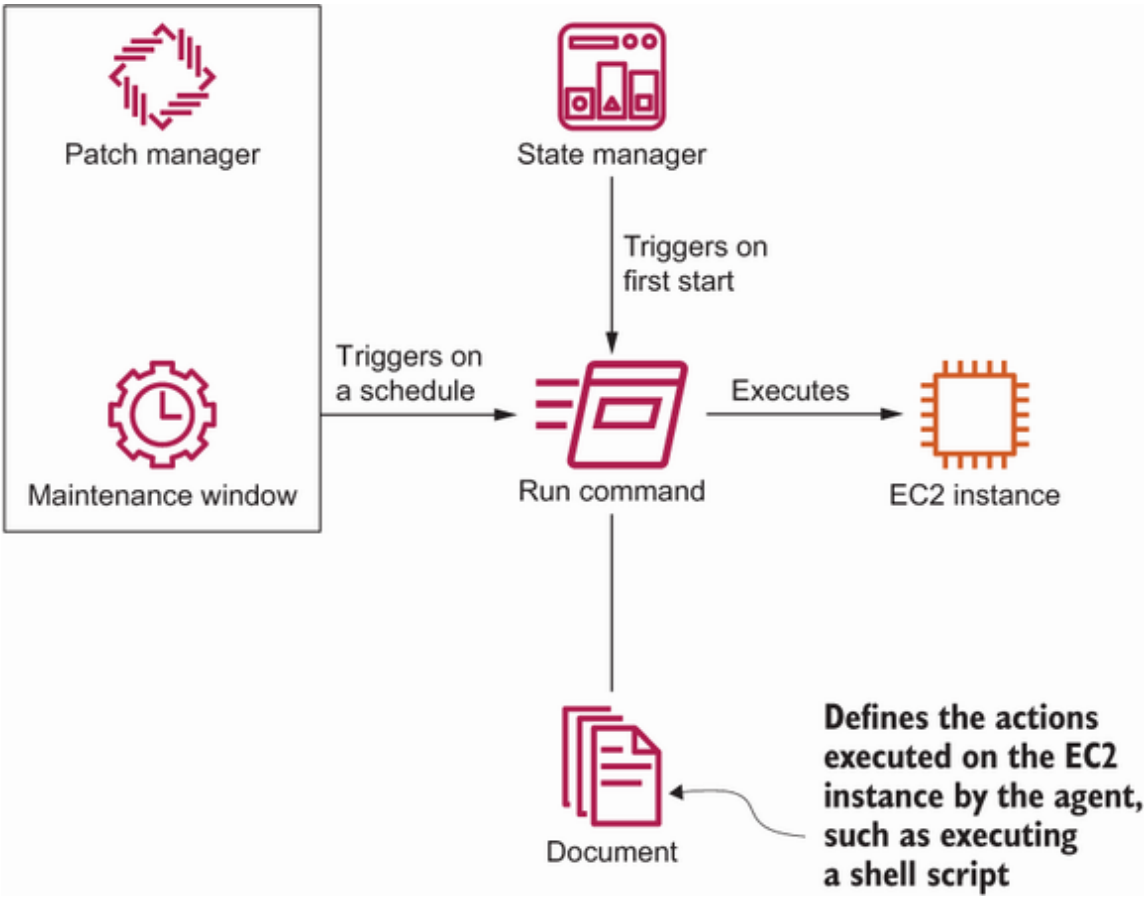

Figure 5.2 SSM features required for Patch Manager capability

The following CloudFormation snippet defines a maintenance window to patch on a schedule as well as an association to patch on startup:

```
MaintenanceWindow:
  Type: 'AWS::SSM::MaintenanceWindow'
  Properties:
    AllowUnassociatedTargets: false
    Duration: 2                                    ①
    Cutoff: 1                                      ②
    Name: !Ref 'AWS::StackName'
    Schedule: 'cron(0 5 ? * SUN *)'                ③
    ScheduleTimezone: UTC
MaintenanceWindowTarget:                           ④
  Type: 'AWS::SSM::MaintenanceWindowTarget'
  Properties:
    ResourceType: INSTANCE
    Targets:
```
