in AssociationRunPatchBaselineInstall.

② Uses the same document AWS-RunPatchBaseline...

③ ...but this time, Operation is set to Scan.

④ Runs every hour

It’s time for a demo. Create the CloudFormation stack with the template located at https://s3.amazonaws.com/awsinaction-code3/chapter05/ec2-os-update.yaml by clicking the CloudFormation Quick-Create Link (http://mng.bz/KlXn). Pick the default Virtual Private Cloud (VPC) and subnet, then wait for the stack creation to finish.

Visit the AWS Systems Manager management console at https://console.aws.amazon.com/systems-manager/. Open Patch Manager in the navigation bar, and you see a nice dashboard, as shown in figure 5.3.
