3. Create a function determining the runtime environment and configuration.
4. Invoke the function to execute your code in the cloud.

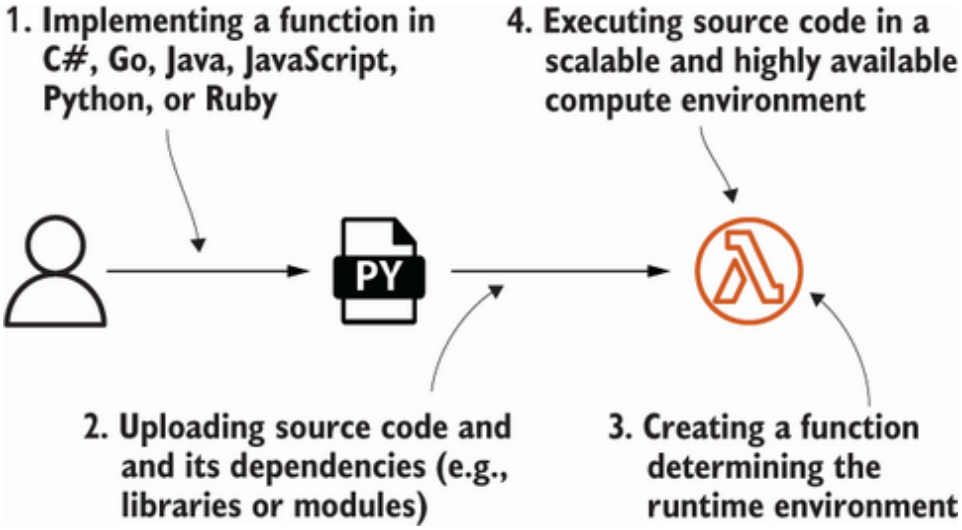

Figure 6.1 Executing code with AWS Lambda

Currently, AWS Lambda offers runtime environments for the following languages:

- C#/.NET Core
- Go
- Java
- JavaScript/Node.js
- Python
- Ruby

Besides that, you can bring your own runtime by using a custom runtime. In theory, a custom runtime supports any programming language. You need to bring your own container image and follow conventions for initializing the function and processing tasks. Doing
