Looking up an Imagery process

You'll now add a route to the Express application to handle `GET /image/:id` requests. Figure 16.13 shows the request flow.

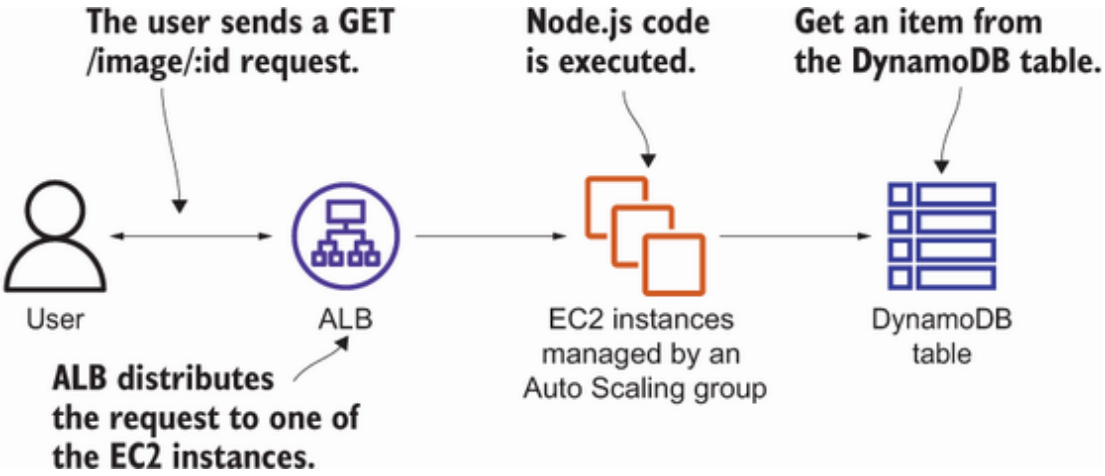

Figure 16.13 Looking up an image process in Imagery to return its state

Express will take care of the path parameter `:id` by providing it within `request .params.id`. The implementation shown in the next listing needs to get an item from DynamoDB based on the path parameter ID.

Listing 16.3 `GET /image/:id` looks up an image process (server/server.js)

```
function mapImage = function(item) {                    ①
  return {
    'id': item.id.S,
    'version': parseInt(item.version.N, 10),
    'state': item.state.S,
    'rawS3Key': // [...]
    'processedS3Key': // [...]
    'processedImage': // [...]
  };
```
