The discussion about which of the two services is better is often very heated and reminiscent of the discussions about the editors vim and emacs. When viewed unemotionally, the functional scope of ECS and EKS is very similar. The both handle the following:

- Monitoring and replacing failed containers
- Deploying new versions of your containers
- Scaling the number of containers to adapt to load

Of course, we would also like to highlight the differences, which we have summarized in table 18.1.
