3.3 Reusable HTML with partial views, tag helpers, and view components

Partial views

Tag helpers

View components

3.4 The PageModel

Passing data to pages

The PageModel as a view model

The PageModel as a controller

4 Matching URLs to Razor Pages with routing

4.1 Routing basics

Route templates

4.2 Customizing route templates

Overriding routes

Route parameters

Binding route data to handler parameters

Catchall parameters

Route constraints

Creating additional routes

Working with PageRouteModel conventions directly

4.3 Generating URLs

The anchor tag helper

Using the IUrlHelper to generate URLs

Generating redirect URLs from ActionResults

Customizing URL generation

Using parameter transformers to customize route and parameter value generation

5 Working with forms: Model binding

5.1 Forms basics

Using the post-redirect-get pattern

Accessing values from Request.Form

Accessing values from Request.Query
