Working with the scaffolded pages

8.5 Creating, modifying, and deleting data

Modifying data

Deleting data

9 Managing users with authentication

9.1 Authentication basics

How authentication works

Adding simple authentication

9.2 ASP.NET Core Identity

Creating a user

Configuring the DbContext

Adding migration

9.3 Customizing Identity

Customizing Identity options

Customizing the user

Scaffolding and customizing the UI

Enabling email confirmation

Disabling UI features

10 Controlling access with authorization

10.1 Basic authorization in Razor Pages

Applying simple authorization

Allowing anonymous access

10.2 Working with roles

Viewing roles

Adding roles

Assigning roles to users

Using policies to apply role checks

10.3 Claims-based authorization

Adding claims to users

Using policies to enforce claims-based authorization

Using assertions for more complex requirements
