Manning: Deirdre Hiam, my project manager; Christian Berk, my copy editor; and Katie Tennant, my proofreader. I would also like to thank all the MEAP customers and reviewers for their invaluable contributions: Charles Lam, Chris Thomas, Foster Haines, Harry Polder, Jiří Činčura, Joe Cuevas, Karl Anderson. Karthikeyarajan Rajendran, Lakshminarayanan AS, Lee Cottrell, Luigi Zambetti, Marc Roulleau, Marek Petak, Markus Wolff, Maytham Fahmi, Michael Holmes, Mitchell Fox, Oliver Korten, Paul Brown, Richard Vaughan, Sadhana Ganapathiraju, Stephen Byrne, Tiklu Ganguly, Timo Salomäki, Tom Gueth, Wes Shaddix, Owain Williams, and Mike Baran.

about this book

ASP.NET Core Razor Pages in Action focuses on one part of the ASP.NET Core framework, Razor Pages, and how you can use it to build dynamic web applications. As you go through the book, you will build an increasingly complex application that features some of the functionality you might find in an online portal that allows users to book short vacations in cities around the world. Each chapter focuses on one of the core areas within Razor Pages, building on what has been learned in the previous chapters.

Who should read this book

This book is intended for anyone who wants to learn how to build basic or complex web applications using Microsoft technologies as simply as possible. The book focuses on the main features of the Razor Pages framework and assumes you already have some knowledge of core web technologies, such as HTML, CSS, JavaScript, and HTTP. None of these
