illustrates how the framework applies the attribute values to the rendered labels.

Listing 6.6 Public `PageModel` properties decorated with suitable attributes

```
[BindProperty]
public string Name { get; set; }
[BindProperty]
[Display(Name = "Maximum Number Of Guests")]
public int MaxNumberOfGuests { get; set; }
[BindProperty]
[Display(Name ="Day Rate")]
public decimal DayRate { get; set; }
[BindProperty]
[Display(Name = "Smoking Permitted")]
public bool SmokingPermitted { get; set; }
[BindProperty]
[DataType(DataType.Date)]
[Display(Name ="Available From")]
public DateTime AvailableFrom { get; set; }
```
