❶ Add this code block to render the selected city if the form has been submitted.

❷ Add a label and the select tag helper for managing city selection.

Navigate to /property-manager/create. You should see London appear in the select control (figure 6.6).

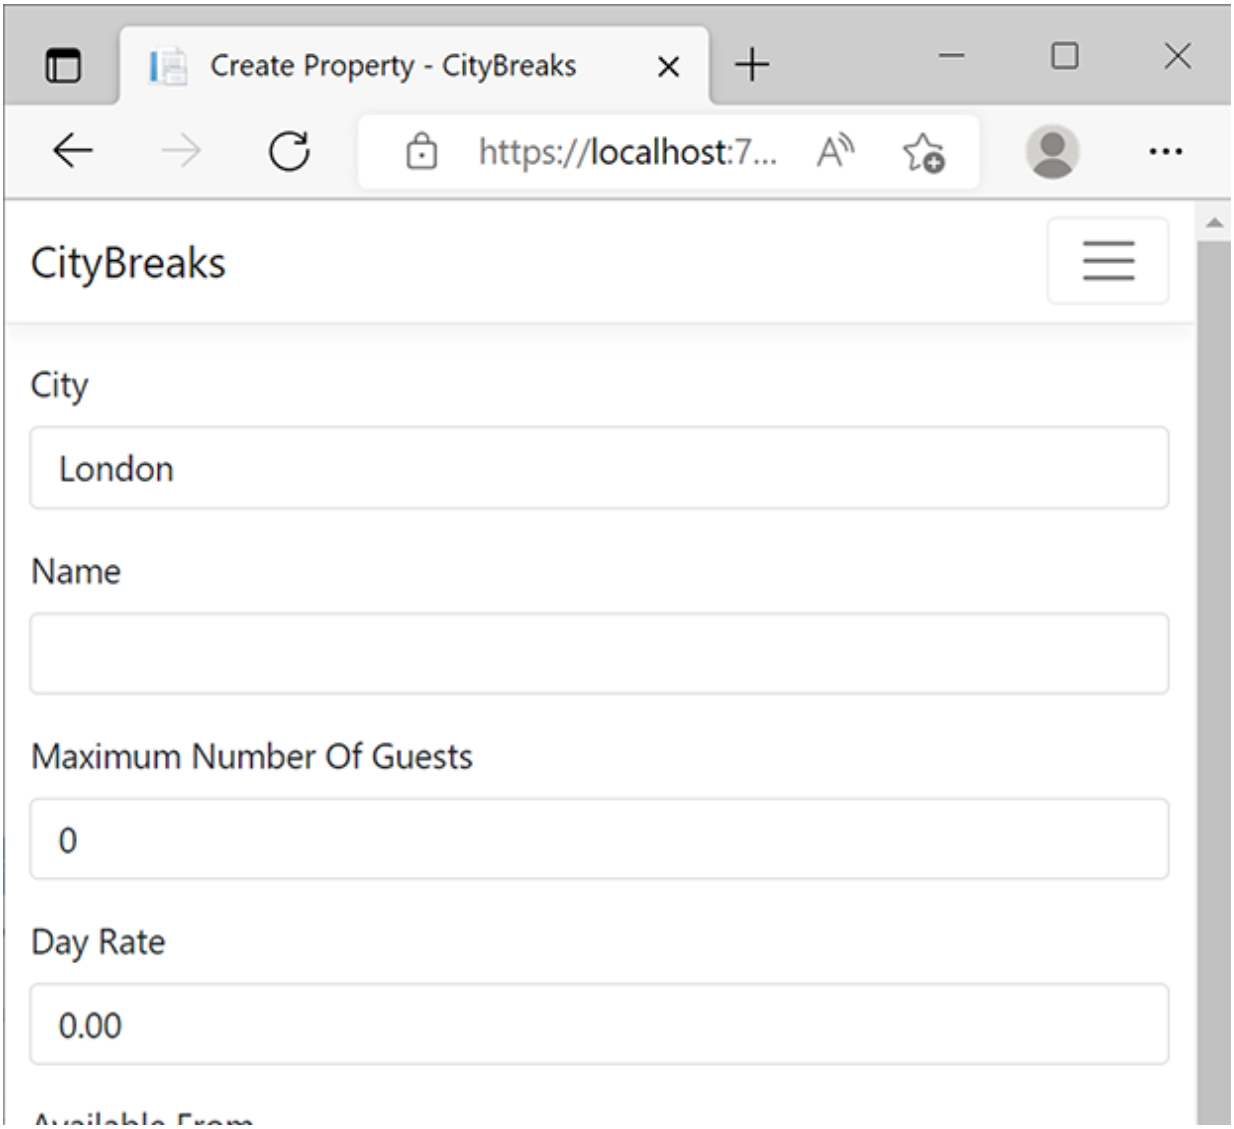

Figure 6.6 London is the default option in the select control.

Feel free to leave the selection as London, or choose another city from the options, and then submit the form. You should notice two things: the first is
