Interface as an option. Replace the existing code with the following.

Listing 7.3 The `ICityService` interface

```
using CityBreaks.Models;

namespace CityBreaks.Services
{
    public interface ICityService
    {
        Task<List<City>> GetAllAsync();
    }
}
```

Easy interface generation for Visual Studio Users

There is an even quicker way to generate an interface for Visual Studio users. Place your cursor on the `SimpleCityService` class name, and press Ctrl-. (period). From the dialog that appears, select Extract Interface... .
