```
<div class="form-group">
    <label asp-for="CityId" class="control-label"></label>
    <select asp-for="CityId" class="form-control"
     ➥ asp-items="Model.Cities"></select>
    <span asp-validation-for="CityId" class="text-danger"></span>
</div>
```

Now you are ready to test the revisions. Run the application, and navigate to /property-manager. You will be taken to the scaffolded Index page, which lists all properties (figure 8.14).
