For the time being, you will register a new account and use it to log in. Click the Register as a New User link, and enter an email address along with a password. The default password requirements are that it should consist of the following:

- A minimum of six characters
- At least one non-alphanumeric character (e.g., *!)
- At least one lowercase character
- At least one uppercase character
- At least one digit

As soon as you submit the registration form, you should find you are automatically logged in to the application (figure 9.6). You should also see there is a single entry in the `AspNetUsers` table (figure 9.7).
