sequential index approach 134 – 136
binding complex objects 127 – 131
binding simple collections 132 – 133
directly to POCOs 403 – 404
enumerations 175 – 177
forms 117 – 123
accessing values from Request.Form collection 119 – 121
accessing values from Request.Query collection 121 – 123
post-redirect-get pattern 117 – 119
multiple values 170 – 172
user input validation 140 – 150
client-side validation 142 – 146
custom validation attributes 148 – 150
DataAnnotation attributes 140 – 142
managing complex validation with ModelState 147 – 148
server-side validation 146 – 147
using with handler parameters 124
using with public properties 125 – 126
model directive 52 – 53
Model property 77, 298
Model.City variable 343
ModelBuilder ApplyConfiguration method 222
ModelOnly option 145
ModelState dictionary 147
ModelState errors 145, 241, 389
ModelState object 147 – 148
months parameter 305
multiple attribute 132, 170 – 171
multiplicity 213
MVC (model-view-controller) pattern 7 – 8
MyDelegate delegate 41
myUnorderedListTemplate variable 59

N

-n (or - -name) option 24
-na (or - -namespace) option 24
name attribute 117, 119, 121, 126, 129, 131, 135, 154 – 155
Name claim 298
name parameter 92 – 93, 410
Name property 126, 163, 183, 257, 310, 385
NameIdentifier claim 298, 311
nameof operator 175, 411
names attribute 398
namespace directive 53
- -namespaceName | -namespace option 234
nav element 68, 256
navigational properties 213
nested class 129
new keyword 192
new operator 83
new page command 24
