time of day, you should see the new paragraph rendered to the browser under the heading, as shown in figure 2.9.

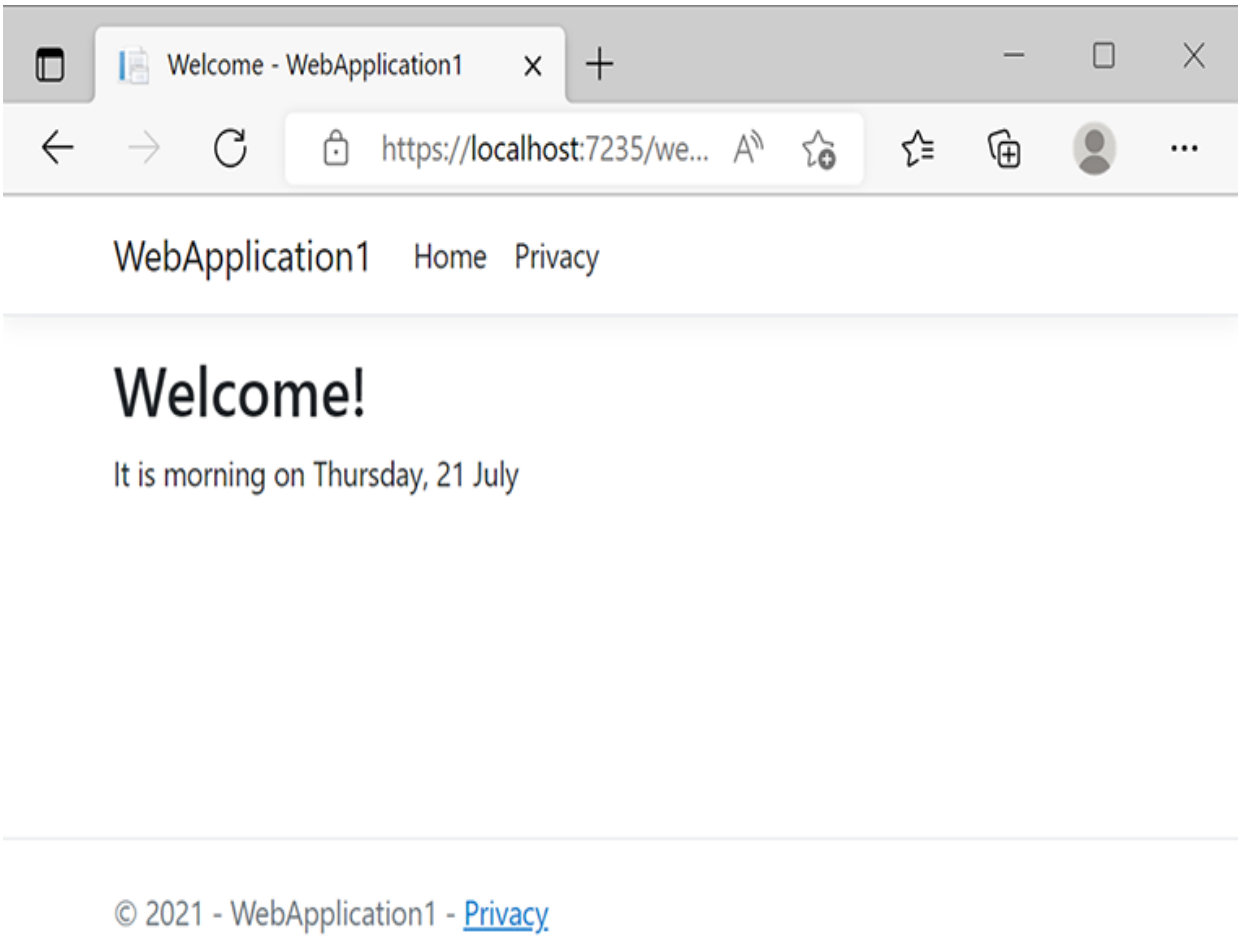

Figure 2.9 The revised Welcome page in the browser

2.1.6 Adding the page to the navigation

Next, you will add your new page to the site navigation, so you won't have to type the address in the browser to locate it. Find the _Layout.cshtml file in the Pages/Shared, folder and open it. Identify the `ul` element with a CSS class of `navbar-nav flex-grow-1`, and add the bolded lines of code in the following listing.
