

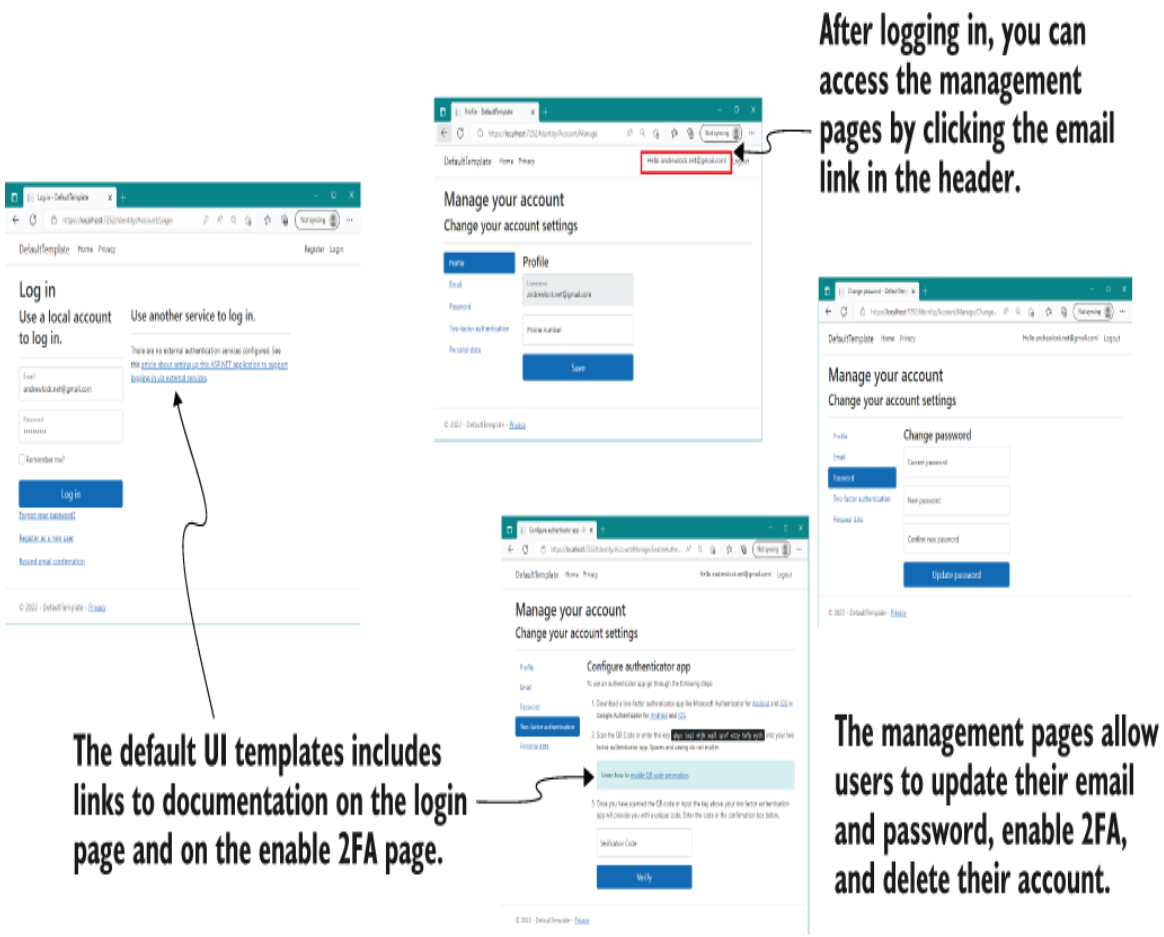

Figure 23.10 Logging in with an existing user and managing the user account. The Login page describes how to configure external login providers, such as Facebook and Google. The user-management pages allow users to change their email and password and to configure MFA.

Once a user has signed in, they can access the management pages of the identity UI. These allow users to change their email, change their password, configure MFA with an authenticator app, or delete all their personal data. Most of these functions work without any effort on your part, assuming that you've already configured an email-sending service.

That covers everything you get in the default UI templates. It may seem somewhat minimal, but it covers a lot of the requirements that are common to
