
specific destination.
ILoggerProviders are registered with the ILoggerFactory using extension methods.
AddConsole()
ConsoleLoggerProvider
The Console logger provider creates a logger that writes to the console.
AddEventLog()
EventLogLoggerProvider
The EventLog logger provider creates a logger that writes to the Windows Event Log.
ILoggerFactory
Calling CreateLogger on the ILoggerFactory calls CreateLogger on each provider and creates an ILogger that wraps each logger implementation.
CreateLogger()
ILogger
ConsoleLogger
EventLogLogger

ILogger usage
Calling Log() on the ILogger writes the message to each of the wrapped logger destinations.
Log()
ILogger
Log()
ConsoleLogger
Console.Write()
Log()
EventLogLogger
EventLog.Log()
