

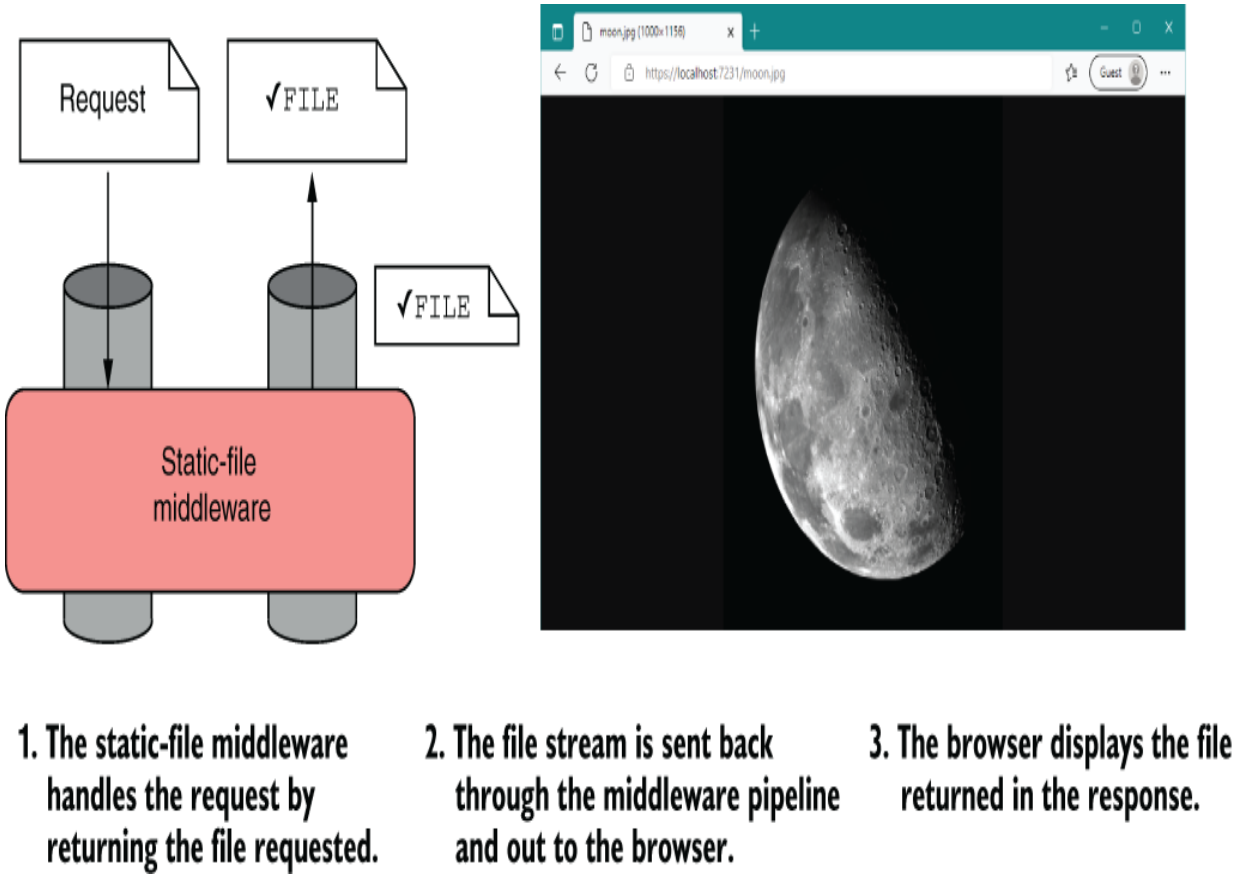

**Figure 4.7 Serving a static image file using the static-file middleware**

If the user requests a file that doesn't exist in the wwwroot folder, such as missing.jpg, the static-file middleware won't serve a file. Instead, a 404 HTTP error code response will be sent to the user's browser, which displays its default "File Not Found" page, as shown in figure 4.8.

**NOTE** How this page looks depends on your browser. In some browsers, you may see a blank page.
