After installing the .NET SDK, you can run commands with the .NET CLI using the `dotnet` command. Run `dotnet --info` to see information about the version of the .NET SDK currently in use, as well as the .NET SDKs and .NET runtimes you have installed, as shown in figure A.1.

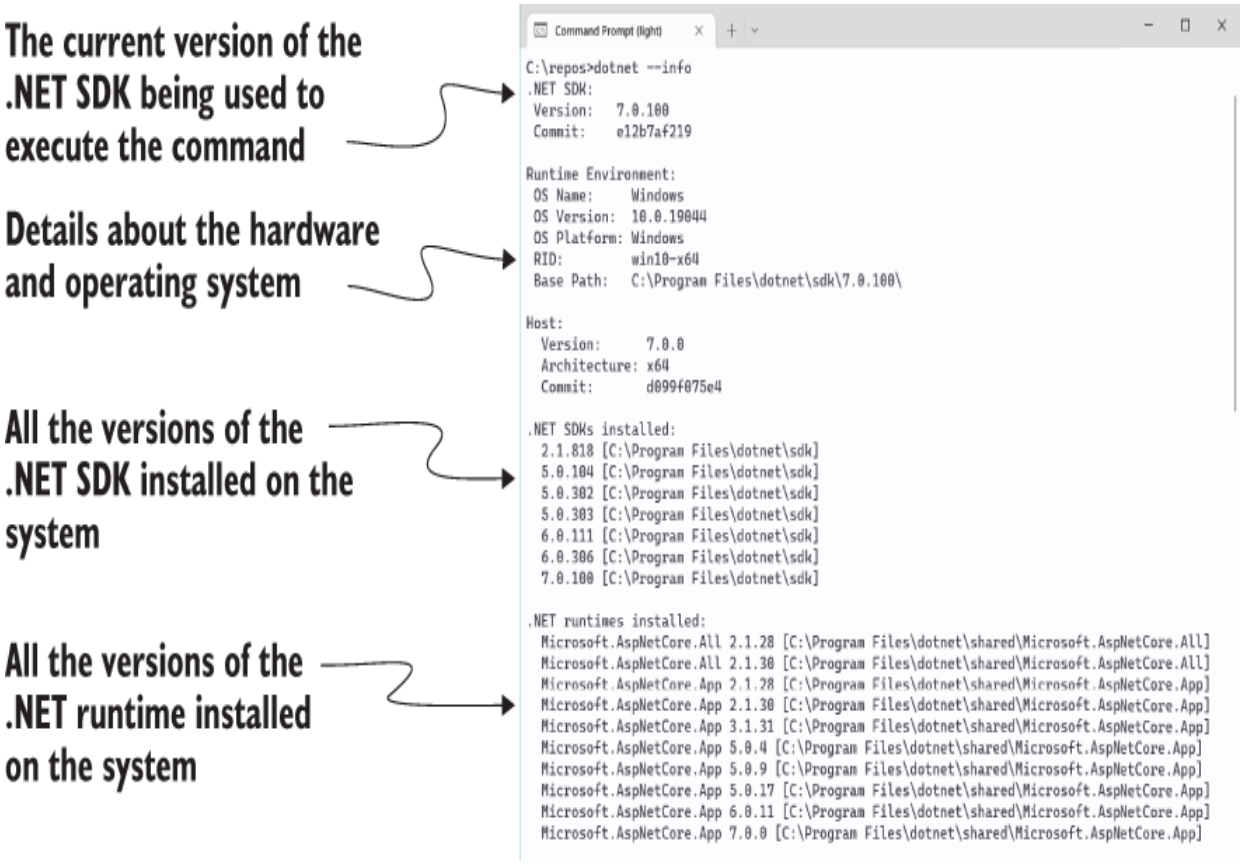

Figure A.1 Use `dotnet --info` to check which version of the .NET SDK is currently used and which versions are available. This screenshot shows that I'm currently using the release version of the .NET 7 SDK (version 7.0.100).

As you can see in figure A.1, I have multiple versions of the .NET SDK installed. This is perfectly fine but not necessary. Newer versions of the .NET SDK can build applications that target older versions of .NET. For
