DbContextOptionsBuilder instance 292
DbSet<Recipe> property 302
DbSet<T> properties 311 – 312
De Sanctis, Valerio 87, 484
Debug configuration 688
Debug level log messages 664
Dec property 450
decimal data type 450 – 451
decimal route constraint 130
declarative programming 613
DefaultLocation key 220
DELETE attribute 502
DELETE request 363, 502
DELETE verb 90, 363
dependency graph 176
Dependency Injection Principles, Practices, and Patterns (van Deursen and Seemann) 174, 188, 920
dependency injection. *See* DI
deploying apps
  ASP.NET Core hosting model 684 – 692
   choosing deployment method 690 – 692
   running vs. publishing 686 – 690
  configuring URLs 702 – 705
  hosting on Linux 697
   preparing apps for deployment 700 – 702
   running apps behind reverse proxy on Linux 698 – 700
  publishing to IIS 692 – 697
   configuring IIS for ASP.NET Core 692 – 694
   preparing and publishing 695 – 697
descriptions
  adding to apps 249 – 252
  adding to endpoints 268 – 275
  refreshing 267 – 268
design patterns 23
Design Patterns: Elements of Reusable Object-Oriented Software (Gamma, Helm, Johnson, Vlissides) 45
DeveloperExceptionPage 76 – 77
development environment 76, 913 – 918
  IDEs and editors 915 – 918
   JetBrains Rider 916
   Visual Studio Code 917 – 918
   Visual Studio for Mac 917
   Visual Studio for Windows 915 – 916
  installing .NET SDK 914 – 915
DI (dependency injection) 49, 173 – 189, 222, 265, 393, 414, 533, 649, 655, 683, 798, 835, 898
  adding ASP.NET Core framework services to container 184 – 186
  benefits of 174 – 180
  containers, third-party 793 – 796
  creating loosely coupled code 180 – 182
  registering services 190 – 214
   in containers multiple times 199 – 202
