lifetimes 202 – 210
resolving scoped services outside requests 211 – 213
using objects and lambdas 195 – 199
with DI containers 191 – 195
using in ASP.NET Core 182 – 183
using services from DI container 186 – 188
using with OptionsBuilder and IConfigureOptions 788 – 793
vs. dependency inversion 174
with filter attributes 551 – 554
DI (dependency inversion) 174, 179
DI container 178, 292, 754, 850
dictionaries, binding 390 – 391
directive statement 411
distributed apps, authentication for 624 – 631
centralizing authentication in identity providers 626 – 629
extending authentication to multiple apps 624 – 626
OIDC and OAuth 2.0 629 – 631
 element 437, 805
Docker in Practice, 2nd ed. (Miell and Sayers) 699
documenting APIs 248 – 279
adding descriptions and summaries to endpoints 268 – 275
using attributes to add metadata 271 – 272
using fluent methods to add descriptions 269 – 270
using XML documentation comments to add metadata 272 – 275
adding descriptions to apps 249 – 252
adding metadata to minimal APIs 254 – 256
limitations of OpenAPI 275 – 278
generated code is opinionated 276 – 277
not all APIs can be described 275 – 276
tooling often lags specification 277 – 278
strongly typed clients 256 – 268
customizing generated code 264 – 267
generating using .NET Global tool 261 – 263
generating using Visual Studio 257 – 261
refreshing description 267 – 268
using generated client to call APIs 263 – 264
testing APIs with Swagger UI 252 – 253
DoesRecipeExist() method 542
domain model 334
