middleware vs. 108 – 109
endpoint middleware 33, 51
endpoint routing 122
EndpointFilterDelegate named delegate type 106
EndpointFilterFactoryContext object 112
EndpointMetadata property 112
EndpointMiddleware class 57
endpoints 69, 88 – 94, 594
adding CORS to 740 – 741
adding descriptions and summaries to 268 – 275
using attributes to add metadata 271 – 272
using fluent methods to add descriptions 269 – 270
using XML documentation comments to add metadata 272 – 275
adding multiple filters to 107 – 108
converting middleware into 784 – 788
defining request handling with 50 – 52
defining route handlers with functions 92 – 94
extracting values from URLs with routing 89 – 90
mapping URLs to with routing 118 – 140
generating URLs from route parameters 133 – 139
in ASP.NET Core 122 – 126
route template syntax 126 – 133
mapping verbs to endpoints 90 – 92
minimal API
applying authorization policies to endpoints 648 – 651
testing 891 – 895
endpoints variable 786
EnsureRecipeExistsAttribute action filter 542, 547
EnsureRecipeExistsAttribute class 552
EnsureRecipeExistsFilter class 552
Entity Framework Core in Action, 2nd ed. (Smith) 165, 281, 305, 307, 309, 906, 910, 919
enum options 453
env variable 462
—environment flag 704
Environment property 51, 239
Environment Tag Helper 462 – 463
<environment> Tag Helper 801
environments 216
Equal() call 882
Error action method 471
error handling
converting error status codes to Problem Details 102 – 103
converting exceptions to Problem Details 100 – 102
IResult interface
returning status codes 95 – 98
returning useful errors 98 – 99
middleware 74 – 82
handling exceptions in production 77 – 82
viewing exceptions in development 76 – 77
Error level log 663, 671
