preparing apps for deployment 700 – 702
running app behind reverse proxy 698 – 700
hosting environments 238 – 246
identifying 239 – 240
loading environment-specific configuration files 240 – 242
setting 243 – 246
hostname 6
href attribute 459
HSTS (HTTP Strict Transport Security) 717
HTML
building using view model 334 – 335
converting Markdown to 805 – 807
generating with Razor Pages 321 – 323
hiding elements from unauthorized users 618 – 620
rendering using Razor views 405 – 433
_VIewImports file 431
_ViewStart file 431 – 433
creating dynamic web pages 416 – 423
creating Razor views 410 – 416
layouts 424 – 428
overview of 406 – 410
partial views 428 – 430
Html property 422 – 423
HTML5 color picker 444
HTML5 email type 449
HtmlHelper method 423
HTTP (Hypertext Transfer Protocol) 6
handling transient errors with Polly 839 – 842
using typed clients to encapsulate calls 836 – 839
HTTP 307 Temporary Redirect status code 721
HTTP 403 Forbidden 614
HTTP API creation 486 – 515
applying MVC design pattern 493 – 497
attribute routing 497 – 502
combining route attributes 499 – 500
handling HTTP verbs 501 – 502
using token replacement to reduce duplication 500 – 501
generating response from model 506 – 511
adding XML support to default formatters 508 – 509
content negotiation 509 – 511
overview of 487 – 493
web API controllers vs. minimal APIs 511 – 513
HTTP APIs 85 – 88
HTTP body 6
HTTP handlers 60
HTTP headers 6, 708
HTTP modules 60
http profile 243
HTTP security headers 716
HTTP status code 6, 67
