IConfigurationBuilder interface 218
IConfigurationRoot interface 218, 222
IConfigureOptions interface 788 – 793
IConfigureOptions<T> 793, 796
ICurrencyConverter 903
ICurrencyProvider 793, 820
id attribute 439, 449
id parameter 93, 109 – 110, 114, 130, 144, 146, 151, 153, 251, 270, 491
Id primary key 575
Id property 384
id property 800
id route parameter 128, 130, 147, 445
identity providers 626 – 629
IdentityDbContext class 573, 581
IdentityUser entity 576, 586
IDEs and editors 915 – 918
  JetBrains Rider 916
  Visual Studio
   macOS 917
   Windows 915 – 916
  Visual Studio Code 917 – 918
IDisposable interface 827, 853
IDOR (insecure direct object reference) 613, 747
IEmailSender interface 181 – 182, 191 – 194
IEndpointFilter interface 112 – 113
IEndpointRouteBuilder 123, 761, 786
IEnumerable<> property 236
IEvangelist blog 923
IExchangeRatesClient interface 838
if attribute 804 – 805
if construct 418
<if> element 805
if loop 418
if statements 433, 462, 799, 803
IFilterFactory attribute 553
IFormFile interface 158 – 159, 391
IFormFileCollection interface 158 – 159, 391
IFruitClient interface 265
IHost interface 854
  creating headless worker services from templates 856 – 858
  running headless worker services in production 859 – 861
IHostBuilder interface 46, 761 – 764
IHostedService interface 847 – 854
  running background tasks on timer 848 – 852
  using scoped services in background tasks 852 – 854
IHostedService.StartAsync() method 849
IHostEnvironment interface 239 – 240
IHostEnvironment.EnvironmentName property 239
IHttpClientFactory interface
  creating HttpClients with 831 – 839
