binding strongly typed settings without 237 – 238
designing options classes for automatic binding 235 – 237
overview of 232 – 234
reloading strongly typed options 234 – 235
IOptionsSnapshot interface 234 – 235
IOrderedFilter interface 529 – 530
IOutputFormatter interface 507, 510
IPageFilter interface 548
IPageRouteModelConvention interface 355
IParsable interface 148
IPostConfigureOptions interface 793
IProblemDetailsService service 100 – 101
IQueryable interface 303, 312
IResult interface 94 – 104
converting responses to Problem Details 99 – 103
error status codes 102 – 103
exceptions 100 – 102
generating URLs from route parameters with 136 – 137
returning status codes with Results and TypedResults 95 – 98
returning useful errors with Problem Details 98 – 99
is not null pattern 148
IsDeleted flag 308, 312
IServiceCollection 184
IServiceProvider 197, 212
IServiceScope 211 – 212
IsReusable flag 554
IStartup interface 758
IsTestProject MsBuild property 876
IsValid() method 815
<ItemGroup> element 879
Items property 328, 453
IUrlHelper helper 350
IWebHostEnvironment 51, 239, 761, 763
