applying authorization policies to endpoints 648 – 651
unit testing endpoints 891 – 895
web API controllers vs. 511 – 513
model binding 120, 128, 141 – 162, 364, 380
arrays 151 – 153
binding complex types to JSON body 149 – 150
binding services and special types 156 – 159
binding file uploads 158 – 159
injecting services 157 – 158
injecting well-known types 156 – 157
binding simple types to requests 144 – 148
binding strongly typed settings without IOptions 237 – 238
choosing binding source 160 – 161
custom binding 159 – 160
designing options classes for automatic binding 235 – 237
extracting values from requests 142 – 144
making parameters optional with nullables 153 – 155
simplifying handlers 161 – 162
Model property 415, 478
model validation, handling user input with
adding validation filters to minimal APIs 167 – 169
DataAnnotations attributes 164 – 167
handling user input with 163 – 169
need for 163
Model. prefix 454
ModelState construct 522
ModelState property 365, 379, 396 – 397, 494, 496, 893
ModelState validation errors 397, 457
ModelState.IsValid pattern 399
ModelState.IsValid property 893
ModelStateDictionary object 396

Mozilla Developer Network (MDN), introduction to HTTP 90
Muhammed Rehan Saeed blog 923
multi-factor authentication (MFA) 628
multiple HTML attribute 454
multiple URLs 120
Must() method 819
MVC (Model-View-Controller) design pattern 330 – 337
binding models 377 – 380
building HTML using view model 334 – 335
complete Razor Page requests 335 – 337
custom validation attributes 812 – 817
directing request to Razor Page and building binding model 332 – 333
executing handler using application model 333 – 334
filters 532 – 555
adding filters to actions and Razor Pages 525 – 528
creating custom filters 533 – 549
creating simple filters 523 – 525
dependency injection with filter attributes 551 – 554
