filter pipeline 517 – 520
filter pipeline short-circuiting 549 – 551
middleware vs. filters 522 – 523
order of filter execution 528 – 530
generating URLs for MVC controllers 349 – 350
HTTP API creation 493 – 497
overview of 328 – 330
replacing validation framework with FluentValidation 817 – 823
adding to apps 821 – 823
DataAnnotations attributes vs. 818 – 821
website creation with MVC controllers 466 – 485
creating web apps 468 – 472
Razor Pages vs. MVC controllers 467 – 468, 472 – 474, 480 – 484
selecting view from controller 474 – 480
MVVM (Model-View-View Model) 331
MyAppConnString key 225
myService variable 414

N

name attribute 439, 449
NAME key 220
name key 220
name parameter 89 – 90, 127, 135
Name property 586
name property 800
name variable 729
named clients 835
nameof operator 233, 542
Namespace attribute 263
netstat command 830
NetworkClient 176 – 177
new keyword 49
newNamespace namespace 411
next endpoint parameter 106
No Managed Code pool 693
noninteger value 130
NotFound() method 366
NotFoundResult 368 – 369
NRT (nullable reference type annotation) 154
NSwag, generating strongly-typed clients using 256 – 268
customizing generated code 264 – 267
generating using .NET Global tool 261 – 263
generating using Visual Studio 257 – 261
refreshing OpenAPI description 267 – 268
using generated client to call APIs 263 – 264
NuGet packages 42
nullable reference type annotation (NRT) 154
nullables 153 – 155
number input type 450
number integer 385
number parameter 385
