20.6 Choosing between web API controllers and minimal APIs

21 The MVC and Razor Pages filter pipeline

21.1 Understanding the MVC filter pipeline

21.2 The Razor Pages filter pipeline

21.3 Filters or middleware: Which should you choose?

21.4 Creating a simple filter

21.5 Adding filters to your actions and Razor Pages

21.6 Understanding the order of filter execution

The default scope execution order

Overriding the default order of filter execution with IOrderedFilter

22 Creating custom MVC and Razor Page filters

22.1 Creating custom filters for your application

Authorization filters: Protecting your APIs

Resource filters: Short-circuiting your action methods

Action filters: Customizing model binding and action results

Exception filters: Custom exception handling for your action methods

Result filters: Customizing action results before they execute

Page filters: Customizing model binding for Razor Pages

22.2 Understanding pipeline short-circuiting

22.3 Using dependency injection with filter attributes

Part 4 Securing and deploying your applications

23 Authentication: Adding users to your application with Identity

23.1 Introducing authentication and authorization

Understanding users and claims in ASP.NET Core

Authentication in ASP.NET Core: Services and middleware

23.2 What is ASP.NET Core Identity?

23.3 Creating a project that uses ASP.NET Core Identity
