4. On the following screen (figure 13.1), do the following:
    - Select **.NET 7.0**. If this option isn't available, ensure that you have .NET 7 installed. See appendix A for details on configuring your environment.
    - Ensure that **Configure for HTTPS** is checked.
    - Ensure that **Enable Docker** is unchecked.
    - Ensure that **Do Not Use Top-level Statements** is unchecked.
    - Choose **Create**.
