

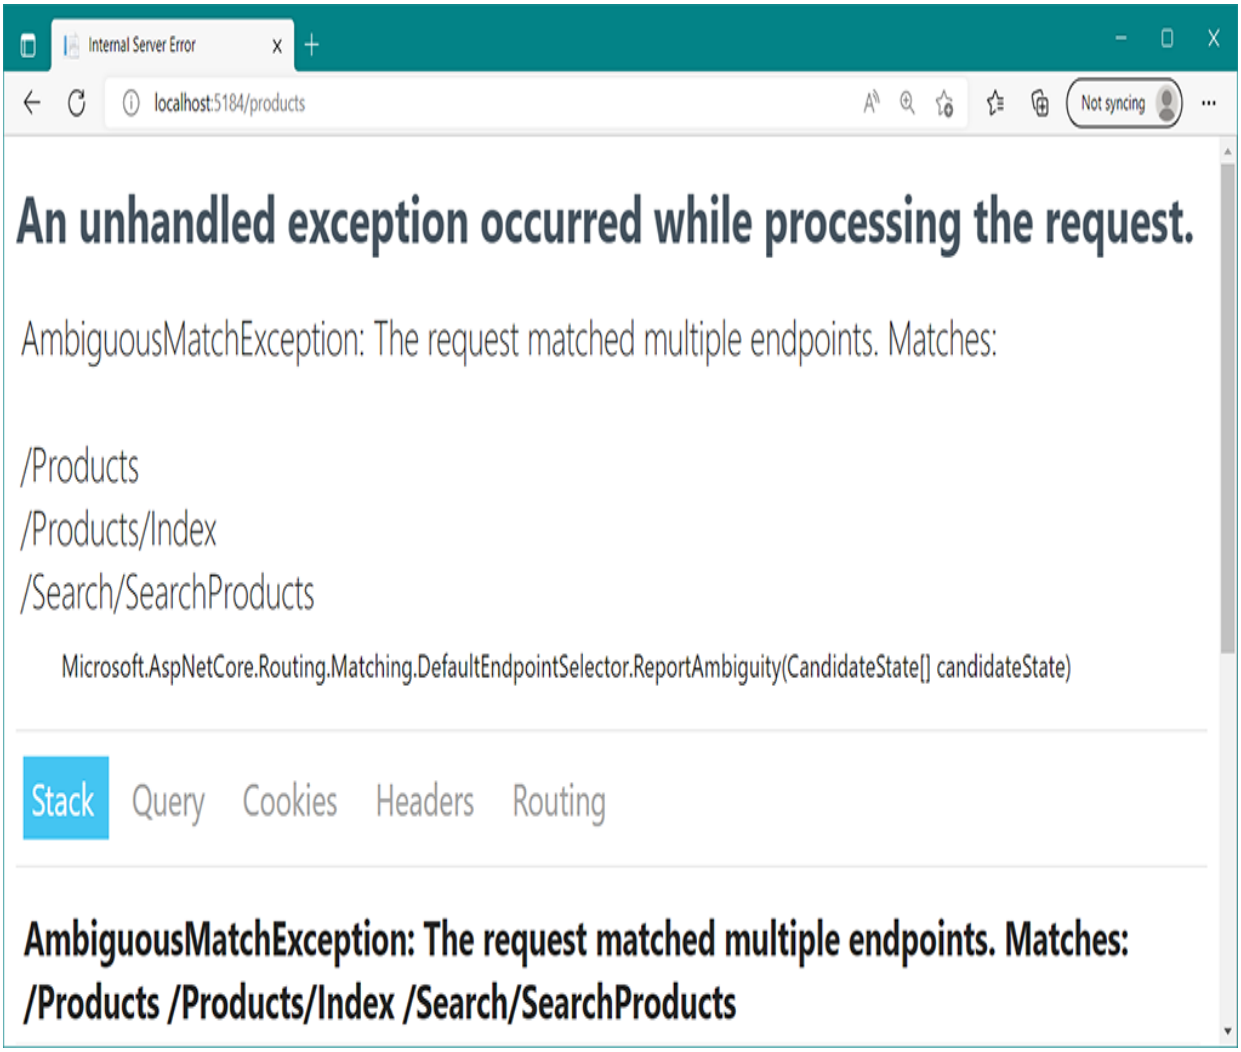

Figure 14.4 If multiple Razor Pages are registered with overlapping route templates, you'll get an exception at runtime when the router can't work out which one to select.

We've covered pretty much everything about routing to Razor Pages now. For the most part, routing to Razor Pages works like minimal APIs, the main difference being that the route templates are created using conventions. When it comes to the other half of routing—generating URLs—Razor Pages and minimal APIs are also similar, but Razor Pages gives you some nice helpers.
