

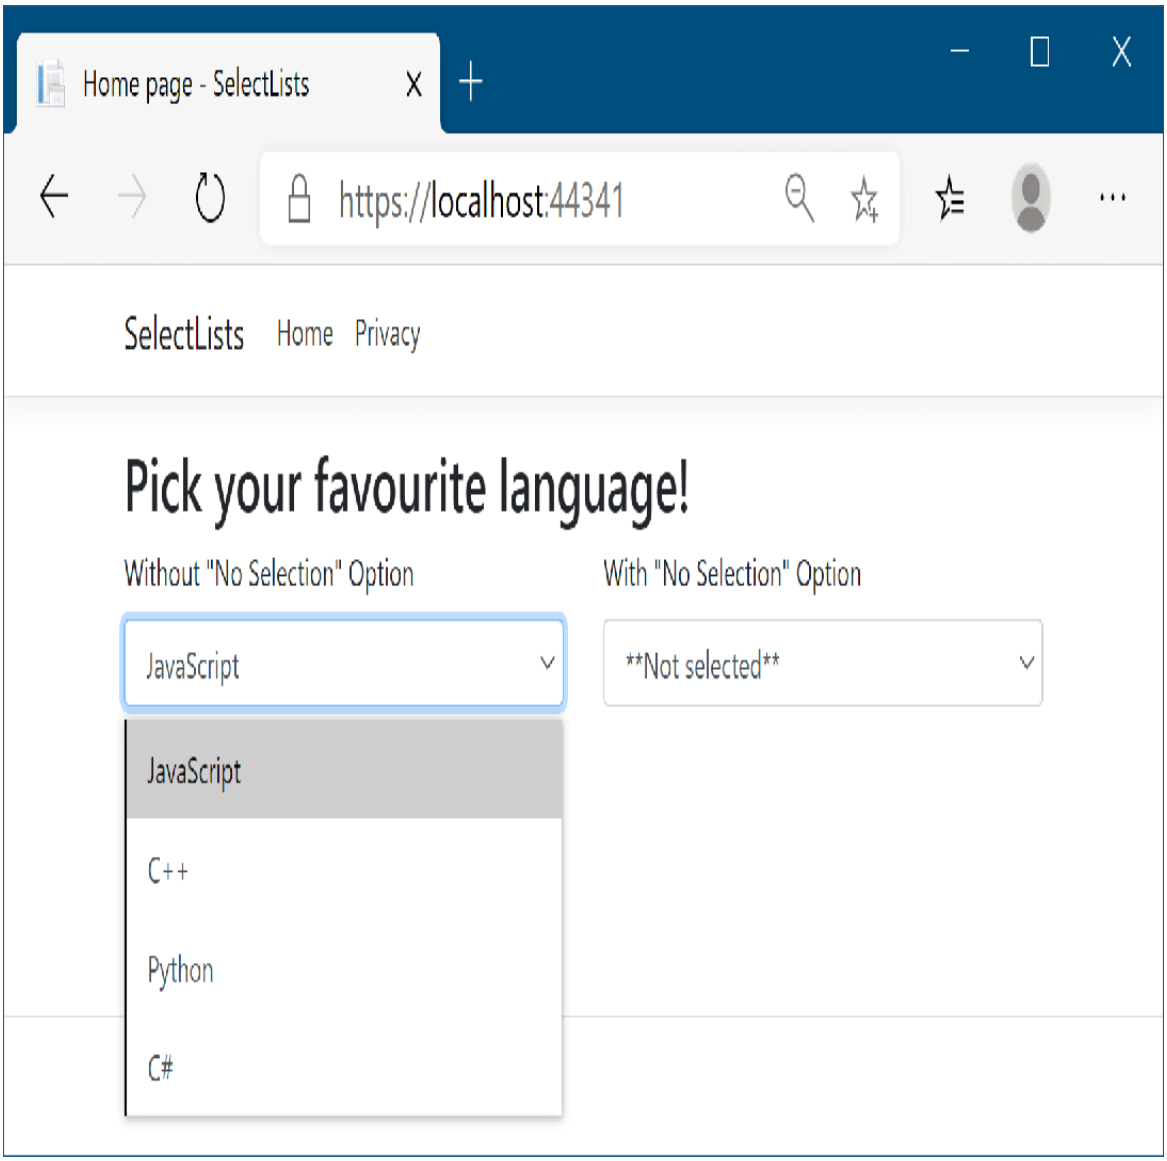

Figure 18.7 Without a “not selected” option, the `<select>` element will always have a value. This may not be the behavior you desire if you don’t want an `<option>` to be selected by default.

You can achieve this in one of two ways: you could add the “not selected” option to the available `SelectListItem`s, or you could add the option to the Razor manually, such as by using

```
<select asp-for="SelectedValue" asp-items="Model.Items">
    <option Value="">**Not selected**</option>
</select>
```
