

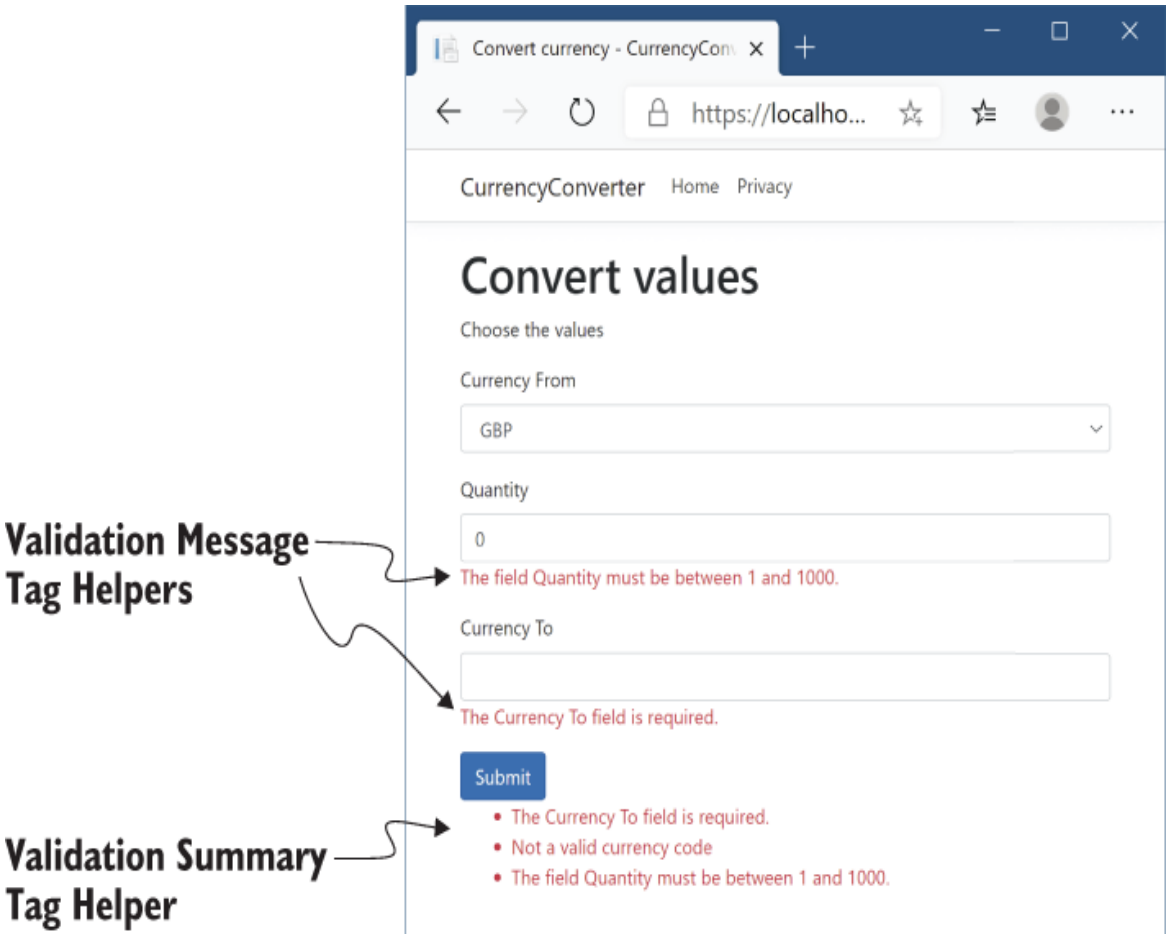

Figure 18.9 Form showing validation errors. The Validation Message Tag Helper is applied to `<span>`, close to the associated input. The Validation Summary Tag Helper is applied to a `<div>`, normally at the top or bottom of the form.

The Validation Summary Tag Helper is applied to a `<div>` using the `asp-validation-summary` attribute and providing a `ValidationSummary` `enum` value, such as

```
<div asp-validation-summary="All"></div>
```

The `ValidationSummary` `enum` controls which values are displayed, and it has three possible values:
