5. Wait for Visual Studio to generate the application from the template. When Visual Studio finishes, an introductory page about ASP.NET Core appears; you should see that Visual Studio has created and added some files to your project, as shown in figure 3.5.

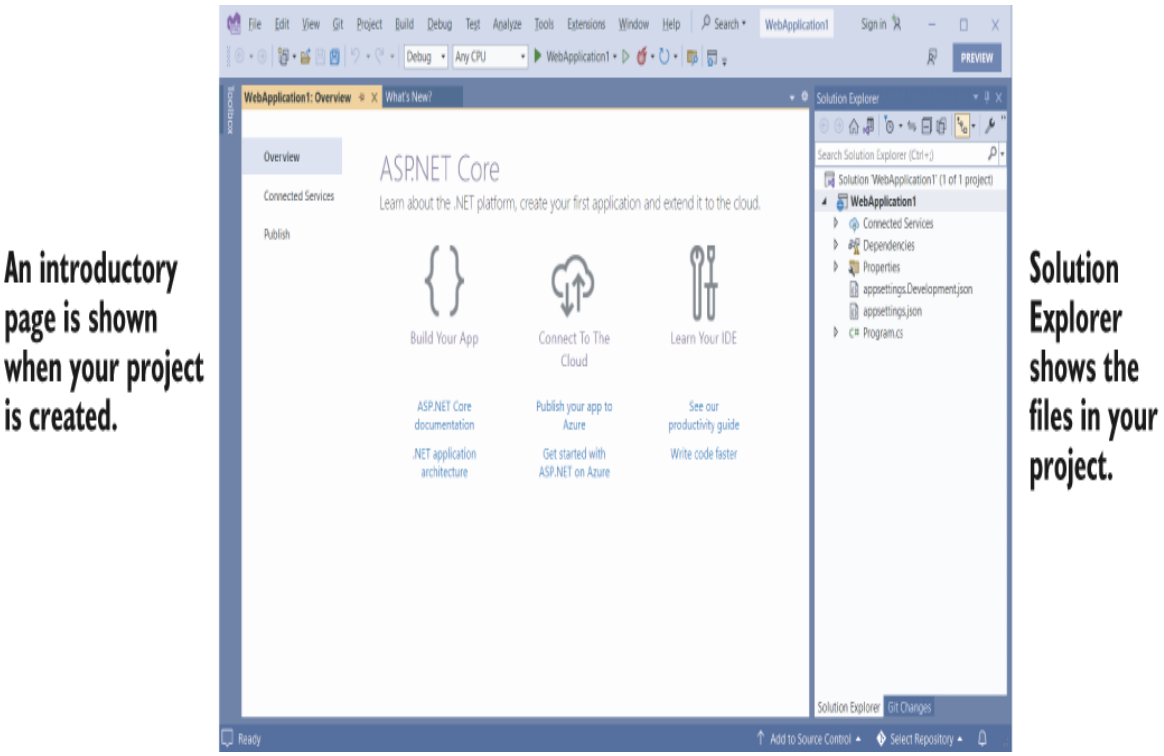

Figure 3.5 Visual Studio after creating a new ASP.NET Core application from a template. The Solution Explorer shows your newly created project. The introductory page has helpful links for learning about ASP.NET Core.

If you're not using Visual Studio, you can create a similar template by using the .NET CLI. Create a folder to hold your new project. Open a PowerShell or cmd prompt in the folder (Windows) or a terminal session (Linux or macOS), and run the commands in the following listing.

Listing 3.1 Creating a new minimal API application with the .NET CLI

```
dotnet new sln -n WebApplication1     ❶
dotnet new web -o WebApplication1     ❷
```
